SLIDE DECK STRUCTURE (6 SLIDES)

SLIDE	TOPIC	KEY CONTENTS & VISUALS
Slide 1	Title & Context	Project title banner, executive framing, DataX Labs branding, and date.
Slide 2	Objectives & Tools	Business questions, analytics objectives, and toolstack (Power BI, DAX, PPT).
Slide 3	Executive Overview	Embedded <i>OVERVIEW</i> dashboard, baseline revenue metrics, monthly trends, regional share.
Slide 4	Category & Region	Embedded <i>Category & Region</i> view, territory sales breakdown, product concentration matrix.
Slide 5	Customer Experience	Embedded <i>Customer Experience</i> view, delivery duration vs. rating scatter, payment split.
Slide 6	Key Takeaways	Prioritized recommendations on catalog diversification, delivery SLA, and CSAT turnaround.

STRATEGIC INSIGHTS & ACTION ITEMS

- **Product Concentration:** Electronics drives the overwhelming bulk of volume and revenue. High opportunity exists to cross-sell and expand into Beauty, Clothing, and Home & Kitchen.
- **Payment Channel Split:** Card transactions lead the order count (~240+ orders), followed by Cash on Delivery (~140 orders) and Digital Wallets (~75 orders). Incentivizing prepaid digital payments will reduce COD risk.
- **Fulfillment vs. Satisfaction:** Scatter analysis shows customer rating (2.94/5.0) is evenly distributed regardless of transit days, suggesting product expectations, return friction, or merchant quality—not just transit speed—dominate dissatisfaction.
- **Execution Focus:** Establish 48-hour delivery SLAs via regional centers and initiate a quality survey taskforce for sub-3-star customer reviews.
