

DATA X LABS CAPSTONE PROJECT

E-Commerce Sales & Customer Experience

Interactive Dashboard Performance Summary, Multidimensional Revenue Analysis, and Strategic Optimization Roadmap.

 Executive Presentation

 Power BI Desktop

 Sales & CSAT Analytics

Project Objectives & Tech Stack

Business Goals

Deliver actionable business intelligence across total revenue (\$5.11M), order volumes (~5K), average basket value (\$1.02K), fulfillment speed, and rating trends to uncover commercial drivers and friction points.

Tools & Tech Stack

Engineered using **Power BI Desktop** with custom DAX data modeling, dynamic slicers for regional/category drilling, interactive cross-filtering, and high-contrast dark-mode theme visuals.

Analytical Scope

Three interconnected views: high-level financial health, category-by-region market penetration, and fulfillment-customer satisfaction correlation with payment distribution analysis.

Sales Performance Overview

\$5.11M

TOTAL SALES

5,000

TOTAL ORDERS

\$1,020

AVG ORDER

Stable Revenue Velocity: Monthly sales exhibit a resilient baseline of ~\$470K+ per sub-cohort with steady run rates across multi-year cycles.

High-Value Transaction Size: Average Order Value holds firmly at ~\$1,020, demonstrating premium consumer purchasing power across catalogs.

Cohesive Segment Contribution: Slicer drill-down (North / Electronics sample shown) captures \$472.45K across 462 orders with 2.94 average satisfaction rating.

Category & Regional Analysis

Electronics

TOP CATEGORY

4 Regions

EAST, NORTH, S, W

472.45K

NORTH SECTOR

Electronics Dominance: Electronics represents the core volume and margin driver across territories, generating significant gross merchandise value.

Regional Diversification: Strong revenue balances between North and remaining zones (East, South, West), proving balanced geographic adoption.

Cross-Selling Potential: Lower relative volumes in Beauty, Clothing, and Home signal substantial whitespace for bundled promotions and category expansion.

Customer Experience Insights

5.94 – 6.1

AVG DELIVERY DAYS

2.94 / 5

AVG CSAT RATING

Card

TOP PAYMENT MODE

Scatter Dispersion Analysis: Ratings (1-5) are evenly spread across 1 to 10 delivery days, revealing no strict linear correlation between transit speed and rating score.

Payment Channel Hierarchy: Card payments dominate total transaction count (~220+ orders), followed by Cash on Delivery (COD) and digital Wallets.

Experience Optimization Gap: An average rating of ~2.94 signals product quality or post-purchase support issues independent of delivery turnaround.

600 × 400

Key Takeaways & Action Plan

Key Findings

High Capital Base: The business achieves healthy unit economics with \$5.11M cumulative revenue and \$1,020 average ticket size.

Catalog Concentration: Over-reliance on Electronics leaves revenue vulnerable to supply chain volatility and competitive discounting.

Rating Paradox: Sub-3.0 ratings persist even with 2-3 day fulfillment, indicating issues stem from product expectations or packaging quality.

Strategic Roadmap

Category Diversification: Deploy bundled cross-merchandising between Electronics and Home/Clothing to lift non-electronics share by 20%.

Quality & Return Audits: Launch post-delivery automated feedback specifically targeting sub-3 rating drivers (defects, manual accuracy).

Payment Incentivization: Provide cashback incentives for instant Wallet and Card checkout to reduce high-risk COD operational overhead.
